

IN THE SPECIFICATION:

Please cancel paragraph 0011 of the Substitute Specification filed with the application. Please replace that cancelled paragraph with replacement paragraph 0011, as follows:

[0011] In accordance with the present invention, this object is attained by the provision ~~by the provisions~~ of a device for controlling a printing press. The printing press includes several units. These units are controlled by a common control system which has a central data memory in which actual values are stored in the form of process variables.
